## EXECUTIVE SUMMARY

Operations leader with 19+ years managing high-availability telecom and fintech infrastructure at a national scale. Currently serve as Chief Operations Officer for Bangladesh's BTRC-mandated A2P SMS Central Platform, overseeing 350M+ messages monthly at 99.9%+ uptime. Combine deep technical expertise in platform reliability engineering with strategic leadership in building high-performing teams and managing complex multi-stakeholder operations. Proven record in MTTR reduction, automation, revenue protection (\$450K+ annual leakage prevented), and cross-functional coordination with regulators, operators, ISPs, banks, and enterprise partners across telecom and fintech ecosystems.

## CORE COMPETENCIES
